

Instructions:

How to Download & Modify ASP Sales Flyers

Step 1: Go to www.autoserviceproducts.com, click on "RESOURCES". Select "Distributor Sales Flyers"

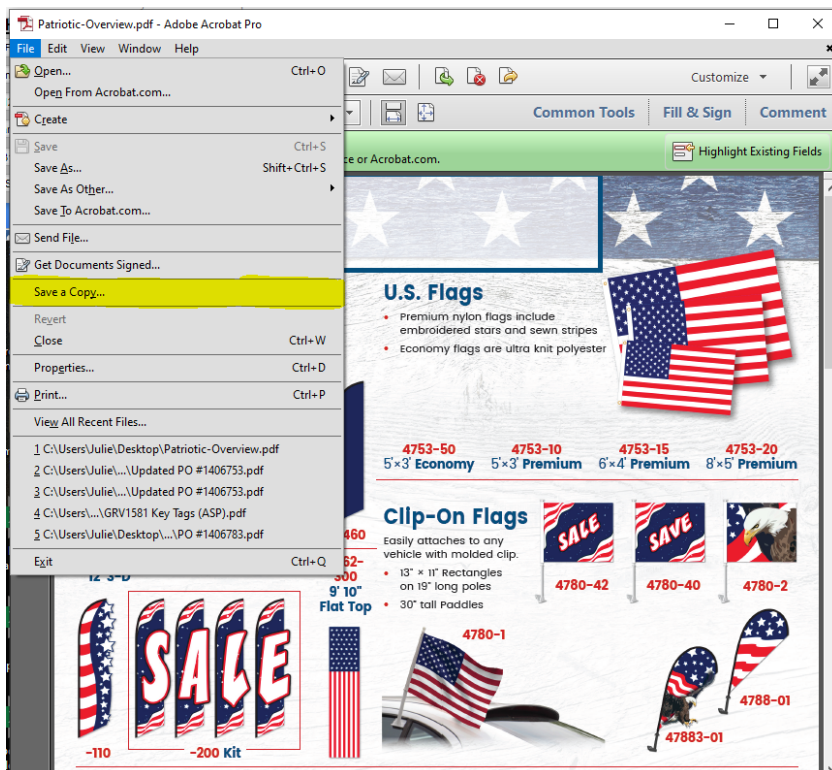

Step 2: Scroll through Customizable Distributor Sales Sheets/Flyers and select the flyer you'd like to download.

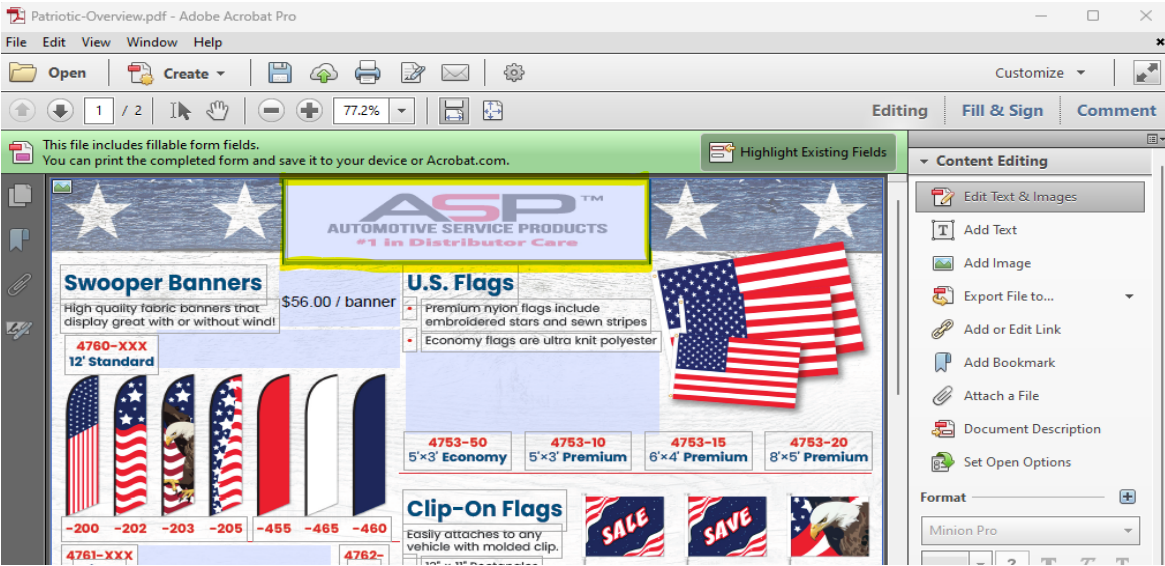

Step 3: Click the “Download”. This will pop-up the document, which you will need to download or print. To download, click the underlined downward facing arrow in the top right-hand corner and save it to your desktop.

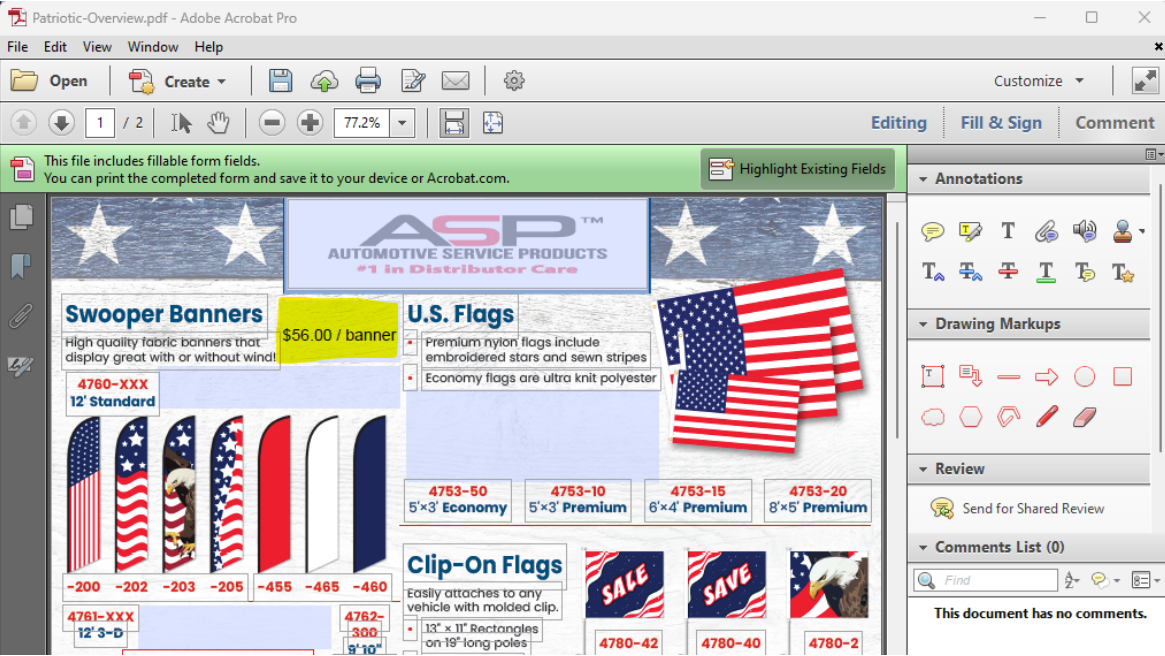

Step 4: Depending on your version of Adobe, you may have to follow this step. If you have an updated version of Adobe, you can ignore this step. If you're having issues editing this file: Open the document on your desktop and save it as a copy. This will allow you to get around any security issues on the document so that you can edit it.

Step 5: Open the saved copy and click “Editing”, "Content Editing" and then “Add Image”. This will allow you to pull your logo, resize it, and move it to the designated area.

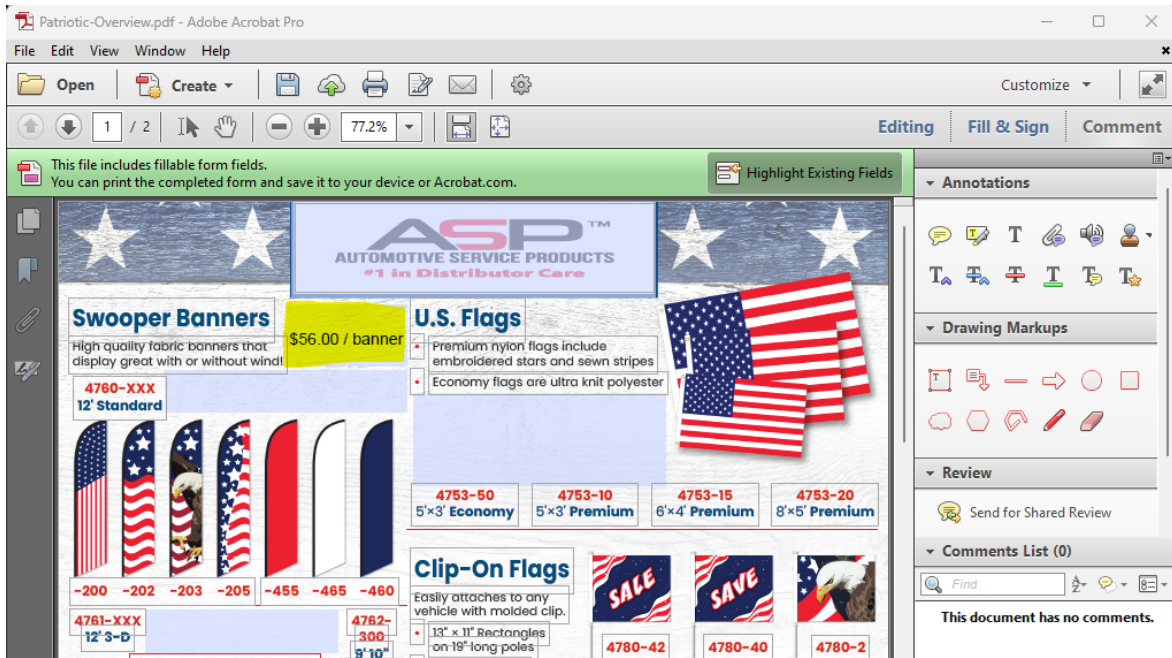

Step 6: Click “Comment” to add pricing to the fillable fields.

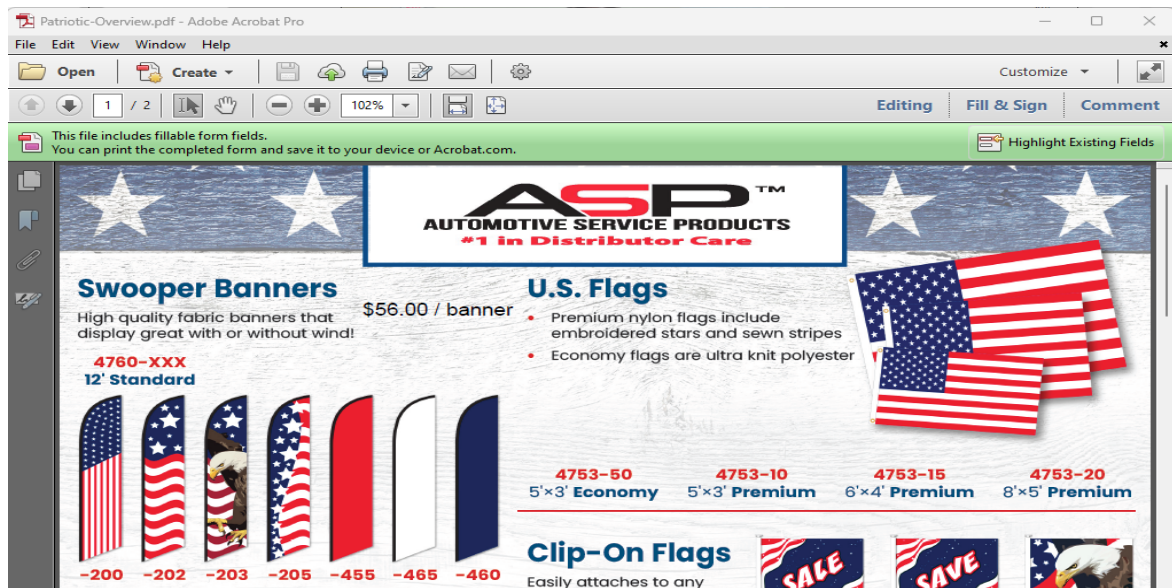

Step 7: Once you're done editing the flyer, click on "Highlight Existing Fields" and it will remove the blue highlighted areas in the background, leaving your pricing and logo easy to read and review.

Helpful tips: There are several versions of Adobe, so if the Highlighted Fields tool bar does not show up automatically on your document and you're unable to find it under your tools, then you need to complete a google search, or search "how to add highlight existing fields on fillable forms" on the Adobe Support site.
